

**Job Title:** Quality Assurance Manager

**Company:** CNC Swiss Inc.

**Location:** 176 Covington Dr. Bloomingdale, Illinois 60108

**Website:** [www.cncswiss.com](http://www.cncswiss.com)

### **Company Information:**

CNC Swiss Inc. was founded in 2007 and is located in Bloomingdale, Illinois. Our state-of-the-art 30,000 sq. ft. facility is equipped with the most modern CNC controlled machining equipment, technology, and processes. We have established ourselves as a leader in complex Swiss machining, delivering high-quality parts and cost reduction opportunities to our customers. With a strong focus on customer service, we serve various industries, including hydraulic, medical, dental, aerospace, industrial, and electronic sectors across the nation and internationally.

### **Position Summary:**

CNC Swiss Inc., a leading precision machining company, is seeking a skilled and experienced Quality Assurance Manager to oversee the quality control processes and ensure the highest standards of quality are maintained throughout our manufacturing operations. As the Quality Assurance Manager, you will be responsible for implementing and maintaining quality control systems, developing quality assurance procedures, conducting inspections and audits, and managing a team of quality control professionals. Your attention to detail, strong analytical skills, and ability to work collaboratively with cross-functional teams will be crucial to ensure the consistent delivery of superior quality products to our customers.

### **Role and Responsibilities:**

- Develop and implement quality control systems, policies, and procedures to ensure compliance with industry standards and customer requirements
- Manage the day-to-day quality control activities, including inspection, testing, and measurement processes
- Conduct regular inspections and audits of manufacturing processes and products to identify areas for improvement and ensure compliance with specifications

- Collaborate with cross-functional teams to address quality issues, drive root cause analysis, and implement corrective and preventive actions
- Establish and monitor key performance indicators (KPIs) to track and improve quality metrics and drive continuous improvement initiatives
- Train and mentor quality control personnel on quality assurance procedures, product specifications, and measurement techniques
- Collaborate with suppliers to establish quality requirements, conduct supplier audits, and resolve quality-related issues
- Ensure compliance with applicable regulatory standards and certifications
- Stay updated with industry trends and advancements in quality control practices and implement best practices within the organization

### **Skills and Qualifications:**

- Bachelor's Degree in Engineering, Quality Management, or a related field (or equivalent work experience)
- Proven experience in quality assurance management, preferably in a precision machining or manufacturing environment
- Strong knowledge of quality control methodologies, tools, and techniques
- Familiarity with ISO 9001, AS9100, or other quality management systems
- Proficient in reading and interpreting engineering drawings, specifications, and GD&T symbols
- Excellent problem-solving and analytical skills
- Strong leadership and team management abilities
- Effective communication and interpersonal skills
- Detail-oriented with a high level of accuracy
- Proficient in using quality control software and MS Office Suite

### **Benefits:**

- Competitive salary commensurate experience and qualifications
- Health, dental, and vision insurance
- Retirement savings plan with company match
- Paid time off and holidays
- Ongoing training and professional development opportunities
- Positive and supportive work environment
- Opportunities for growth and advancement within the company

**Work Environment:**

CNC Swiss Inc. offers a dynamic and technologically advanced work environment. Our 30,000 sq. ft. facility is equipped with the most modern CNC controlled machining equipment, technology, and processes. We foster a collaborative and inclusive culture where teamwork, innovation, and continuous improvement are valued. As a member of our Chicago area team, you will have access to unmatched experience in complex Swiss machining and the opportunity to work on challenging projects across various industries.

**Physical Demands:**

The role of Quality Assurance Manager may require occasional physical activity, such as walking, standing, or lifting light

Join the Chicago area team at CNC Swiss Inc. and become part of our commitment to excellence in CNC Swiss machining. Apply today to join our team of professionals dedicated to delivering superior customer service and manufacturing precision quality parts for industries across the nation and around the globe!
